

Main Languages & Technologies

- HTML5/CSS3/JS
- React/Vue/Svelte
- SASS
- Git, Github
- Node.js, Express, Flask
- Python, C++, Java
- GCP (Firestore, Cloud storage, ...)

Experiences

June 2019 - Current

Boba Watch

<https://boba.watch>

Founder

Founded, developed, and deployed a mobile PWA that helps users track drink consumption/finances as well as a social media interface for them to interact.

- Developed with React/SASS/git and hosted on GCP
- Serves thousands of registered users with several hundred MAU
- Designed app architecture from ground up while supporting all production-level features (i18n, a11y, custom styling library, etc.) as the sole developer.
- Still maintaining and creating new features on top of existing infrastructure

July 2020 - Aug 2020

Experimental Software

<https://experimental.software>

Front-End Developer

Developed and deployed static site for healthcare institution

- Developed with React/SASS/git
- Complied fully with HIPAA regulations
- Worked with designer and manager to deliver project on time

Education

- University of California, Irvine
- Computer Science, B.S.
- Sept 2021

Projects/Awards

- Won 4 hackathons, participated/mentored/judged in 25+ hackathons <https://devpost.com/ryabn/>
- Designed & developed portfolio site
<https://ryqn.dev/>
