EDUCATION

Pasadena City College
Pasadena, CA
B.S Computer Science

August 2017 -
June 2019 (Expected)

PROJECTS

Offluckas Photography (Client Website)
— *https://offluckas.studio*

Designed and wrote portfolio website from scratch for client.

LITPCC Website (Organization Website)
— *https://litpcc.com*

Designed and wrote website for tech-focused organization as well as the libraries that power the site - such as a router in vanilla js

News Aggregator (News App)
— *https://calhacks-2018.github.io/project*

Collaborated with a team to create a data visualization tool that aggregates news articles from around the world and provides a responsive user interface to engage with the data. Programmed the all of the front-end functionality as well as the back-end REST server API using expressjs.

FindC (Contraceptive Finding App)
— *https://dh2018-findc.github.io/FindC/*

Worked with a partner to help people around the world find discounted or free contraceptives around them. Designed and coded user experience on the front-end using reactjs and other popular libraries.

ORGANIZATIONS

Leadership in Tech : PCC
— Chair of Web Development

Hosted web development workshops at local community college and maintained the organization website/developed new features.
